I think that being able to automate tasks that eases difficulty for many people, like the casts that are demonstrated, is a benefit to society. Previously difficult tasks can be simplified and repeatedly completed in an efficient manner of time which can alleviate many problems that people face in today's age. However, I think that the program that allows users to paint any image that they want with only minor changes through consecutive uses stifles creativity a tiny bit for those who do know how to draw. This is because each drawing is unique, even those attempting to copy others, through more subtle traits than just minor color variations.
